bilginc.com

Overview

A technical hands on training course covering firewall technologies. This focuses on the whys and hows of firewall technology rather than looking at manufacturer specific issues. SSH IPsec DMZ.

Prerequisites

There are no formal prerequisite courses, just a good knowledge of how IP works.

A good suggested course would be TCP/IP foundation for engineers

What You Will Learn

By the end of the course delegates will be able to:

- Design secure firewall protected networks.
- Test firewalls.
- Evaluate firewalls.
- Configure firewalls.
