What You Will Learn

Training Content – What Will You Learn?

Introduction to ABAP

- Understand the core logic of ABAP and its role in the SAP ecosystem.
- Begin with basic commands and expand into modular code structures.

Start Coding Now!

- Write your **very first ABAP code**.
- Learn to trace the flow of a program and troubleshoot simple errors.

Real-World Applications

- Test your skills with real-life enterprise-level scenarios.
- Learn how to write code that not only works—but performs optimally.

Outline

- Basics of ABAP Programming
  - Developing a Simple ABAP Program
  - Introducing ABAP Syntax
  - Implementing a Simple Dialog
  - Customizing the ABAP Editor
- Coding and Debugging in ABAP
  - Defining Simple Variables
  - Defining Text Symbols Performing Arithmetic Operations Using Simple Variables
  - Using System Variables
  - Debugging a Program
  - Creating an ABAP List
  - Processing Character Strings
- Control Flow Structures in ABAP
  - Implementing Conditional Logic
  - Implementing Loops
- Runtime Errors and Error Handling
  - Analyzing Runtime Errors
  - Implementing Error Handling
- Additional ABAP Programming Techniques
  - Retrieving Data From the Database
  - Describing Modularization in ABAP
  - Using Function Modules
