Overview

This interactive workshop is designed to help professionals strengthen their strategic thinking capabilities and improve long-term decision-making. Participants explore the mindsets, behaviors, and common pitfalls that influence strategic choices in dynamic business environments.

Through practical exercises, collaborative discussions, and real-world case studies, learners apply strategic frameworks such as SWOT analysis, horizon scanning, and scenario planning. The workshop encourages participants to move beyond reactive thinking and develop a more structured, forward-looking approach to problem-solving and decision-making.

By the end of the session, each participant will have created a personal strategic thinking toolkit that can be immediately applied in the workplace.

Prerequisites

Participants should:

- Have a basic understanding of strategic thinking principles.
- Be familiar with goal-setting or planning activities.
- Be interested in using structured approaches to support projects, initiatives, or organizational objectives.

Who Should Attend

This course is ideal for:

- Managers and supervisors
- Team leaders
- Project managers
- Business and strategy professionals
- Individuals responsible for driving change, initiatives, or organizational growth

What You Will Learn

Upon completion of this workshop, participants will be able to:

- Recognize the habits, mindsets, and challenges that influence strategic thinking.
- Understand how vision and strategic frameworks support effective decision-making.
- Apply practical tools to evaluate business situations and identify appropriate responses.
- Build a personal toolkit for integrating strategic thinking into everyday work.
