Duration: **4 Day**

***Please note there is an approval process for each JAMF course. the delegate does not have a confirmed place on the course until they have been approved. Therefore we can't guarantee that delegates will be able to book onto their prefered date as this is subject to approval.**

The Remote Jamf 370 Course offers a core understanding of how to leverage Jamf Pro and Jamf Protect for the security of macOS endpoints, as well as an enterprise-focused examination of the macOS platform security. Our hands-on, scenario and example-based course environment is the optimal way to continue learning how to securely manage and protect Macs with Jamf.

Prerequisites

- Basic scripting knowledge including variables and if statements.
- Current, version 10 issued certification, obtained from the Jamf 200, 300 or 400 Courses as listed below:
    - Jamf Certified Tech
