Duration: **2 Day**

Overview

This two-day course provides IT professionals with the skills to configure and manage Citrix NetScaler Gateway 14.x. It covers implementing secure remote access solutions, configuring authentication, managing client sessions, and integrating with Citrix Virtual Apps and Desktops. Participants will gain practical experience through hands-on labs to address real-world remote access requirements effectively.

Prerequisites

- Understanding of NetScaler ADC architecture, setup, and management.
- Knowledge of TCP/IP, HTTP, OSI model, and networking protocols.
- Completion of NS-201: NetScaler ADC 14.x Administration is recommended.

Target audience

- IT administrators, engineers, and architects working with Citrix NetScaler Gateway.

What You Will Learn

- Configure authentication, authorisation, and auditing.
- Integrate NetScaler Gateway with Citrix components.
- Define end-user access and experience.
- Troubleshoot network and connectivity issues.
