

# Big Data Workshop

Eğitim Tipi: **Classroom**

Süre: **1 Day**

## **Eğitim Hakkında**

This workshop provides principles and practices you can use to incorporate big data projects into your BI and analytics programs. You will experience a practical approach to big data planning and implementation. Working in groups, you will apply the principles and practices to develop a big data program for a sample scenario that represents a typical big data initiative. You will use templates and worksheets that will also be helpful to plan, organize, and operate your own big data program.

## **Önkoşullar**

There are no prerequisites for this course.

## **Kimler Katılnmalı**

- BI and analytics program and project managers
- BI and data warehouse architects, designers, and developers
- Business managers, business analysts, data analysts, and data scientists who need to plan and execute big data projects
- Technical managers and architects who need to integrate big data technologies into the BI and analytics toolkit

## **Neler Öğreneceksiniz**

- How big data fits into a BI program and how it affects program management
- To identify and prioritize big data opportunities
- To develop a big data road map that sequences and synchronizes business capabilities, services and systems, implementation projects, and new technologies
- To establish scope and plan resources for big data projects
- To enhance your BI architecture to include big data solutions
