

# IIBA® Business Analysis Methodology Processes and Concepts

Eğitim Tipi:

Süre: 3 Day

## Eğitim Hakkında

The Project Management Institute (PMI®), the International Institute of Business Analysis (IIBA®), is one of the leading organizations in the software development industry that combines the most important factor on project success with "Requirement Management".

The purpose of this training is to develop the competencies of the persons involved in Software Development Projects in the Business Analysis processes and in the collection, identification and documentation of software requirements, in line with the methodology established by the IIBA, taking into consideration the best practices in the World. Within the scope of the training, the methodology developed by IIBA®, the techniques and tools used in the methodology, are transferred together with the sample applications taken in real life, and the methodology is aimed to be used in daily life.

- Improving the quality and customer satisfaction of product, which is a deliverable of the project.

## Eğitim İçeriği

### **Introduction to Business Analysis**

- Role of Business Analyst
- Basic Concepts of Business Analysis
- Basic Qualifications of Business Analysts
- Software Development Life Cycle
- Project Management Life Cycle and Process Groups
- Project Roles and Qualifications
- Stakeholders
- Requirements
- BABOK® Purpose
- Introduction to BABOK® Information Fields

### **Business Analysis Planning and Monitoring**

- Planning the Business Analysis Approach

- Planning the Involvement of Stakeholders
- Planning the Business Analysis Governance
- Planning the Business Analysis Information Management
- Identifying Performance Developments of Business Analysis

### **Ascertainment and Collaboration**

- Preparation for Ascertainment Works
- Performance of Ascertainment Works
- Confirmation of Ascertainment Works
- Communication of Business Analysis Details
- Management of Stakeholder Collaboration

### **Management of Requirements Life Cycle**

- Monitoring of Requirements
- Maintenance of Requirements
- Prioritization of Requirements
- Evaluation of Requirement Changes
- Approving the Requirements

### **Strategy Analysis**

- Current Status Analysis
- Defining the Target Status
- Assessment of Risks
- Defining the Change Strategy

### **Requirements Analysis and Design Definition**

- Defining and Modeling the Requirements
- Confirming the Requirements
- Approving the Requirements
- Defining the Requirements Architecture
- Defining the Design Options
- Analyzing and Offering a Solution for Potential Value

### **Solution Evaluation**

- Measurement of Solution Performance
- Analysis of Performance Measurements
- Evaluation of Solution Limits
- Evaluation of Enterprise Limits
- Recommending the Actions to be Taken to Increase the Value of Solution

### **Business Analysis Techniques**

#### **Data Models Business Analysis Techniques**

- Data Library
- Data Modeling
- Data Flow Charts

#### **Process Models Business Analysis Techniques**

- Process Modeling
- User Stories
- Acceptance and Evaluation Criteria
- Connection Analysis

#### **Behavior Models Business Analysis Techniques**

- Use Case Diagrams
- Activity Diagrams
- Sequence Diagrams
- State Transition Diagrams
- Class Diagrams
- Other UML Diagrams

#### **Other Business Analysis Techniques**

- Decision Analysis
- Concept Modeling
- Scope Modeling
- Business Model Canvas
- Root Cause Analysis

- Business Rules Analysis
- Persona
- Prototyping
- Functional Separation
- SWOT Analysis

## **Case Study**

### **Sample Exam Questions for IIBA® Certification Program**
