Neler Öğreneceksiniz

- Tools available to develop Android applications
- Android OS architecture
- Work with components on Android devices
- Use Android SDK and API tools to design effective and attractive apps for Android mobile devices
- Java language classes and objects built to work within the Android operating system
- Knowledge required to write compelling Android applications

Eğitim İçeriği

Module 1

- Creating and Running Java Apps with Eclipse
- Data Types, Variables, and Operators
- Control Statements
- Methods
- Arrays
- Object-Oriented Java
- Inheritance and Interfaces
- Inner Classes

Module 2

- Introduction to Android
- Development Tools
- Creating Your First Application: Hello World
- Debugging and Profiling Android Applications
- The Application Life Cycle
- Working with Application Resources

Module 3

- User Interface: Fields, Buttons, and Labels
- User Interface: Selection Widgets
- User Interface: Lists
- User Interface: Containers
- User Interface: Progress Bars, Time Pickers, and Clocks
- Creating Menus and Messages

Module 4

- Filters and Intents
- Working with the Internet
- Working with Web Services
- Working with XML
- Audio and Video
- Animation
- The Built-In SQL Database

Module 5

- Working with the Built-In Camera
- Geolocation Services
- Working with Google Maps
- Working with the Browser
