Certified in the Governance of Enterprise IT (CGEIT®) is a globally recognized certification developed by ISACA for professionals responsible for governing, managing, and aligning enterprise IT with business objectives. The certification validates advanced knowledge and expertise in **Enterprise IT Governance**, helping organizations maximize value from technology investments while effectively managing risk and compliance.

This training program provides participants with the skills needed to implement governance frameworks, align IT strategies with business goals, enhance organizational performance, and strengthen enterprise decision-making processes. The course combines governance principles, risk management practices, strategic alignment methodologies, and performance management techniques essential for modern IT leadership.

CGEIT is widely regarded as one of the most prestigious credentials for professionals involved in enterprise governance, digital transformation, and executive-level IT management.

Prerequisites

There are no mandatory training prerequisites; however, the following experience is highly beneficial:

- IT governance or IT management experience
- Knowledge of enterprise risk management
- Familiarity with business and IT strategy
- Experience in management, advisory, audit, or assurance roles

Who Should Attend

This course is ideal for:

- **IS/IT Directors**
- **IS/IT Managers**
- **IT Governance Professionals**
- **IT Governance Consultants**
- **IT Executives**
- **Risk Managers**
- **Compliance Managers**
- Enterprise governance specialists
- Audit and assurance professionals
- Digital transformation leaders

Certified in the Governance of Enterprise IT (CGEIT) incl QAE Training

Duration: **3 Day**
