bilginc.com

Duration: **3 Day**

This course provides essential knowledge and practical tools to ensure the safe, ethical, and compliant use of Artificial Intelligence across the enterprise. It empowers every employee who interacts with AI systems, data, or AI-enabled tools to understand and manage governance risks in their daily work. The course addresses the gap between rapid AI adoption and governance awareness, highlighting that most failures are preventable with basic knowledge and adherence to process.

Prerequisites

No prior knowledge or skills are required.

Target audience

This course is designed for all employees who interact with AI systems, data, or AI-enabled tools.

What You Will Learn

By the end of this course, learners will be able to:

- Explain why AI governance matters to their daily work and the organization
- Identify common governance risks in their interactions with AI and data
- Apply governance principles when using AI tools, handling data, or proposing AI solutions
- Recognize warning signs of governance violations and know how to escalate appropriately
- Understand their personal role in the organization's AI risk management strategy
