Overview

This course provides information and hands-on exercises for management of HPE SimpliVity. It also includes information and hands-on exercises for using HPE SimpliVity RapidDR software that simplifies and accelerates offsite disaster recovery through automation. The course covers a range of administration actions executed on HPE SimpliVity system with the HPE SimpliVity Plug-in for VMware vSphere® and the RapidDR user interface.

Audience

This course is intended for infrastructure administrators and system engineers who need to learn how to administer HPE SimpliVity

Prerequisites

HPE recommends that students attend the following courses or attain the following levels of experience before taking this class:

- Networking technologies
- VMware vSphere 6
- HPE ProLiant Servers

What You Will Learn

• Describe the various components that form the HPE SimpliVity federation

• Distinguish between peer-managed and centrally-managed HPE SimpliVity federations

• Identify how VM data is stored across HPE SimpliVity clusters

• Create datastores and perform different tasks associated with HPE SimpliVity datastores

• Explain the various HPE SimpliVity operations like Clone or Move VM

• Create manual and policy-based backups and use them for restore

• Configure external stores for secondary backup

• Perform basic support tasks on the HPE SimpliVity federation

• Use RapidDR to reduce service disruptions by automating remote site recovery
