Building Modern Data Analytics Solutions on AWS Training

Duration: **4 Day**

BİLGİNÇ IT Academy
info@bilginc.com
+44 20 3807 0925
+90 212 282 7700

Prerequisites

- Students with a minimum one-year experience managing; data analytics solutions, streaming data, open-source data frameworks such as Apache Spark or Apache Hadoop will benefit from this course.
- We suggest the AWS Hadoop Fundamentals course for those that need a refresher on Apache Hadoop
- We suggest the Streaming Data Solutions on AWS whitepaper for those that need a refresher on streaming concepts

We recommend that attendees of this course have:

- Completed AWS Technical Essentials
- Completed Architecting on AWS
- Completed Getting Started with AWS Glue
- Completed Data Analytics Fundamentals

What You Will Learn

- How to leverage AWS data Services to store, process, analyze, stream, and query data to make decisions with speed and agility at scale
- How to modernize data solutions end to end
- Skills to put your data to work to make better, more informed decisions, respond faster to the unexpected, and uncover new opportunities
