Overview

The training is an immersive and practical experience for professionals who aim to **lead DevOps transformations** and influence organizational change.
This course equips participants with the **skills, tools, and leadership mindset** necessary to drive DevOps adoption, align teams, and eliminate silos across departments.

In modern organizations, successful DevOps leaders must blend **technical knowledge, agile thinking, and cultural awareness** to build high-performing, resilient teams.
Through **real-life case studies, group exercises, and value stream mapping workshops**, this course empowers leaders to guide their organizations through the complexities of cultural evolution and operational transformation.

This certification prepares learners to successfully complete the **DevOps Leader (DOL) certification exam**, governed by the **DevOps Institute**.

Bilginç IT Academy is an officially **Accredited Training Organisation (ATO)** by **PeopleCert**, the global leader in professional certification and exam delivery.
As an authorized PeopleCert partner, we deliver accredited training and official certification exams for **ITIL®, PRINCE2®, DevOps, and other PeopleCert-certified programs**, ensuring our learners receive globally recognized credentials with the most up-to-date curriculum.

Visit our official PeopleCert partner page here: Bilginç IT Academy – PeopleCert Official Partner

Important Information:
This course is an official program accredited by PeopleCert and is offered **only together with the corresponding certification exam**. The course fee **includes the exam fee**.
Participants can take the certification exam online through PeopleCert's examination system and earn an internationally recognized certificate.
This practice is mandatory to ensure compliance with PeopleCert's quality standards and accreditation guidelines.

DevOps® is a registered trademark of the PeopleCert group. Used under licence from PeopleCert. All rights reserved.

Prerequisites

A general understanding of **DevOps concepts, terminology, and practices** is recommended, along with relevant work experience in IT or software development.
