Overview

Learn the basic concepts and techniques of project management.

In this course, you will be introduced to the project management life cycle and key project management concepts of constraints, stakeholders, scope, risk, and communication.

Students pursuing a university-recognized and/or accredited certificate in Canada or continuing education units in the US must attend at least 90% of class time, participate in class exercises and section-knowledge checks, and score at least 70% on an end-of-class, multiple-choice assessment.

Who Should Attend?

- Project team members who want to perform basic project management tasks on their projects or teams
- Business analysts who are working toward their Certified Business Analysis Professional (CBAP®) certification
- Anyone interested in becoming a project manager or exploring it as a career
- Anyone who works with project managers, such as IT staff, functional managers and team members, sales representatives, and administrative personnel.

What You Will Learn

- Roles and responsibilities of a project manager
- Project management terminology as you apply basic project management concepts
- Essential management skills and techniques of project management
- Common project challenges
- How you can play a more active role in supporting a project
