Overview

This practical micro-credential program helps participants transform agile coaching concepts into real-world skills. Through interactive exercises and scenario-based learning, learners will explore the key competencies required to effectively support agile teams and organizations.

The course focuses on facilitation, coaching, mentoring, advising, teaching, and leadership practices that enable professionals to guide individuals and teams toward continuous improvement and sustainable success.

Prerequisites

There are no mandatory prerequisites for attending this course. However, a basic understanding of Scrum or Agile principles is recommended to maximize learning outcomes.

Who Should Attend

This course is ideal for:

- Professionals aspiring to become Agile Coaches
- Leaders supporting Agile transformation initiatives
- Managers seeking greater value from Agile investments
- Individuals looking to strengthen coaching and facilitation capabilities
- Scrum Masters expanding their coaching toolkit
- Agile practitioners developing advanced team coaching skills

What You Will Learn

Upon completion of this course, participants will be able to:

- Design and facilitate sessions that encourage engagement and collaborative decision-making
- Promote learning through storytelling, facilitation techniques, and varied instructional approaches
- Effectively balance mentoring, coaching, and advisory practices
- Establish trust, ask impactful questions, and provide meaningful feedback
- Foster accountability, resilience, transparency, and collaboration
- Support team growth through reflection, expectation management, and constructive coaching conversations
