BCS Combined Foundation and Practitioner Certificate in Enterprise and Solutions Architecture Training

Duration: **5 Day**

BİLGİNÇ IT Academy
info@bilginc.com
bilginc.com

This intensive 5-day course equips participants with both the foundational knowledge and practical skills needed to succeed in enterprise and solution architecture roles.

Participants will explore core architecture domains, learn to align IT with business strategy, and gain hands-on experience presenting effective solutions.

By the end of the course, they'll be able to engage stakeholders confidently, influence decision-makers, and apply architecture principles in real-world contexts—preparing them for certification and career advancement.

Prerequisites

There are no formal prerequisites for this course. It is accessible to anyone interested in understanding enterprise and solution architecture, regardless of prior experience.

To take the practitioner exam (paid for and booked separately) participants must first take the included foundation exam, unless they are already certified in the TOGAF ® EA Standard 9^{th} or 10^{th} edition at Practitioner Level (L2) which is accepted as an alternative.

Recommended reading for any learner undertaking this certification is detailed below:

- Title – Solution Architecture Foundations
- Author – Mark Lovatt
- Publisher – BCS
- Publication Date - 2021

Target Audience

This course is designed for:

- Those who have some architecture in IT experience and want to take their abilities to the next level.
- Individuals involved in or transitioning into architecture roles, including enterprise, solution, and domain-specific architects.
- It is also suitable for professionals seeking to broaden their knowledge of architecture domains or begin their certification journey in enterprise architecture.
