Scoping and Scheduling Successful Projects Training

Duration: **2 Day**

BILGINÇ IT Academy
info@bilginc.com
bilginc.com

Learn the tools and techniques necessary to determine and deliver products, services, and results that meet requirements, expectations, and deadlines.

Accurately defining project scope sets the foundation for a successful project that accomplishes organizational needs. Research has shown that substandard requirements and scoping techniques often result in projects exceeding their planned budgets by as much as 200%. Additionally, generating a realistic schedule based on accurate resource and duration estimates troubles even the most the senior project managers. This course, based on PMI®'s PMBOK® Guide, Sixth Edition, provides participants with the tools and techniques to help them determine and deliver products, services, and results that meet requirements, expectations, and deadlines.

Who Should Attend?

Project managers, project team leads, and project team members (with or without a currently-active PMI certification) who want to gain a deeper understanding of and hands-on experience with project scope and schedule tools, techniques, and outputs, as documented in the PMBOK® Guide, Seventh Edition.

Prerequisites

To ensure that you benefit fully from this course, you should have experience managing, leading, or contributing to projects. A PMI project-management credential such as PMP® or CAPM® is recommended but not required.

What You Will Learn

Upon successful completion of the Scoping and Scheduling Successful Projects Training, you will be able to:

- Understand Project Scope Mgt. Processes and Key Outputs
- Requirements, Scope, and Negotiations
- The Scope Management Planning Process
- The Requirements Management Planning Process
- Monitor and Control processes
