Overview

The training certification is a globally recognized executive program designed to shape senior cybersecurity professionals
into strategic leaders who can align security initiatives with business objectives.

Developed by an international advisory board of **seasoned CISOs**, this course blends technical expertise
with **business acumen, governance, risk, and leadership skills** essential for modern information security executives.

It equips participants to design, lead, and manage **enterprise-wide information security programs**, combining technical understanding with strategic management and financial planning.

The **EC-Council Certified Chief Information Security Officer (C|CISO)** is not just a certification — it is the definitive credential for **executive cybersecurity leadership**.

Graduates of this program demonstrate mastery in aligning information security with organizational strategy,
managing risk, and leading teams to protect enterprise assets in a dynamic threat landscape.

With **C|CISO**, you move beyond technical proficiency to become a **strategic, board-level security leader**
capable of shaping the future of cybersecurity governance and resilience.

Bilginç IT Academy is an **Official Accredited Training Partner of EC-Council**, delivering EC-Council-authorized cybersecurity trainings and certification programs globally.

Prerequisites

To be eligible for the **C|CISO certification exam**, candidates must:

- Possess **at least 5 years of experience** in **three or more of the five C|CISO domains**.
- Submit an **exam eligibility application** to EC-Council.

Candidates without the required experience may pursue the **EC-Council Information Security Manager (EISM)** credential
and later upgrade to **C|CISO** upon meeting the eligibility criteria.
