Overview

The {*training} begins with an introduction to the fundamentals of the Django web application framework, guiding participants step-by-step through the installation process. Together with the instructor, participants will create a simple web application that demonstrates Django's principles and components.

Prerequisites

Recommended Module Combinations

- Combine this course with **Python for Nonprogrammers** or **Python for Programmers** to strengthen your Python skills.
- Follow it up with **Advanced Django** to explore more advanced Django topics.

Who Should Attend

This Django course is designed for both beginners and programmers with some prior experience in Django.

- You should have experience in an object-oriented programming (OOP) language.
- Python knowledge is ideal but not required to get started.
- A basic understanding of web application development with databases is recommended.

Introduction to Django Training
