Overview

TypeScript is a superset of the JavaScript language that introduces Type Safety to the --- language. This two-day practical programming course will introduce you to scalable, safe and maintainable JavaScript code that can be used with any modern framework including Angular2 and ReactJS

Prerequisites

It is essential you understand the face of contemporary web development to attend this course. We insist upon JavaScript experience equivalent to the skills covered in Web Fundamentals - JavaScript (QAJSFUND).

Please note: Before attending this class delegates must have a Microsoft account (signing up one is free). The instructions on how to set up a Microsoft account can be found here.
