## Overview

**Learn to create and manage a project schedule using Microsoft® Project 2016.**

Create and manage a project schedule using Microsoft® Project 2016.

**Who Should Attend?**

This course is designed for a person who has an understanding of project management concepts, is responsible for creating and modifying project plans, and needs a tool to manage those project plans.

## Prerequisites

Basic project management knowledge and skills are required to be successful in this course. Additionally, you should be able to create a new project plan, manage time in a project plan, manage tasks in a project plan, manage resources in a project pan, and share a project plan.

## What You Will Learn

Upon successful completion of this course, you will be able to manage an existing Microsoft Project 2016 project plan. You will:

- Update a project plan to reflect progress as you execute the project
- Monitor project progress in the project plan
- Adjust the project plan to control constraints
- Create project reports to share a project's status
- Customize project settings and share customizations with other projects

## Outline

**Day 1**

**Monitoring Project Progress**

- View Project Progress
- Add Custom Fields
- Create Custom Tables
- Create Calculated Fields
- Create Concatenated Fields
