Practical Application of Change Enablement Eğitimi

Süre: **2 Gün**

BİLGİNÇ IT Academy
info@bilginc.com
bilginc.com

This two day course bridges ITIL theory and real environment practice specifically for Change Enablement. Participants will work with an instructor through tools, considerations, and actionable steps to implement, improve or assess the Change Enablement (Change Management) practice in their organisation.

Prerequisites

An ITIL® 4 Foundation certificate is preferred, although a basic understanding of ITIL will also be sufficient.

Target audience

This course is suitable for anyone responsible for or interested in change activities within their organisation—regardless of role or structure.

Neler Öğreneceksiniz

Participants will be equipped to:

- Clarify the vision and metrics trail for change
- Assess current state through change models, authorities, baselines, and value streams
- Define future state via business cases, SMART objectives, success measures, and authority structures
- Plan the journey with improvement plans, communication, KPIs, roles, and interfaces
- Execute change planning and monitoring (including stakeholder engagement)
- Validate outcomes through scorecards, reviews, benefits realisation, and baselines
- Sustain momentum with new authorities, evolving value streams, and iteration

Eğitim İçeriği

What’s the vision

- Vision to metrics trail
- Purpose of change
- RACI

Where are we now

- Change models
- Change authorities
- Change schedule
