Overview

The APMG- Change Management Certification has been described as the “definitive certification for professionals dealing with organizational change, transition and transformation.” *(APMG International)*

This interactive Change Management course will enable you to understand and effectively manage the impact of change on organisations and their people. It explores key concepts including how individuals and organizations respond to change, how to lead change through stakeholder engagement and communications and the techniques used by a change manager to ensure the implementation of successful transformation initiatives.

The 5-day course is divided into a 3-day Foundation event and a 2-day Practitioner and includes a digital copy of the latest Change Management v3 APMG study guide, several QA authored assets designed to assist and enhance your learning, and both the Foundation and Practitioner Certified exams.

Drawing on a variety of different learning resources, your QA expert trainer will guide your learning, and support you, as you develop skills and knowledge through a participative and engaging course.

Prerequisites

No prerequisites are necessary for attendance, although delegates may benefit from some experience of organizational change prior to attending the course.

Pre-course Work

QA provides learning materials that will help delegates prepare for the learning sessions. This will include:

- Study advice to guide your learning
- A summary of the main topics so that learning, knowledge retention and course participation is maximised
- The case study used in the course
- Questions for delegates to self-test their initial understanding of the subject
- Early access to the APMG Official Change Management Study Guide (211 pages)
