

# APMG Agile Project Management Practitioner - AgilePM®

Learn via: **Classroom/Virtual**

Duration: **3 Days**

## **Overview**

This three-day accredited course provides participants with a thorough grounding in the DSDM Agile Project Management framework. The course included the in-depth Practitioner-level examination of how a project manager applies the framework.

Presented by skilled lecturers with extensive experience in the practical application of project management, the course includes examination coaching and practice using sample questions.

### **This course does not cover the Scrum Framework.**

Delegates should be prepared to set aside time to revise for the Practitioner exam in the evenings after the course lecture finishes. This includes studying the course Handbook, and working through sample exam questions.

## **Prerequisites**

Delegates must already be qualified at APMG agile Project Management Foundation level and will need to provide evidence on day-one of the course.

The Practitioner course is intended for anyone who expects to have a management or leadership role in an Agile project and is specifically built to support anyone who needs to apply the DSDM Project Management framework in a business environment. Delegates are expected to have experience of team leading, project management, or project assurance/support. This course is not aimed at delegates new to project management and Agile.

### **Proof of identity**

Delegates must bring signed photo ID APMG examinations (e.g. passport, driving license, student card) as they will be asked by the invigilator to produce it prior to the exam. Delegates must also be familiar with the APMG Terms and Conditions of Certification which can be found on the APMG International website.

### **Pre-Course Reading**

Delegates are expected to already own the latest copy of the Agile Project Management Handbook (version 2.0) and be conversant with its content. The Handbook must be brought to the course.

## **What You Will Learn**

At the end of this course you will be able to:

- Set up an Agile project
- Identify appropriate people for Agile roles
- Define Increments and Timeboxes to keep a project on track
- Manage a Solution Development Team
- Communicate with business stakeholders in a project environment
- Use Agile techniques, including prioritisation of requirements, to ensure on-time project delivery,
- Present the benefits of Agile approaches to senior management
- Identify risks to delivery of projects managed using the DSDM Agile approach

## **Outline**
