

Professional Scrum Master

Learn via: **Classroom**

Duration: **2 Days**

Overview

This training TM (PSM) is a course that covers the principles and (empirical) process theory underpinning the Scrum framework, and the role of the Scrum Master in it. This course is a combination of instruction and team-based exercises, and teaches what is at the heart of the Scrum and Agile movement. The course also includes a free attempt at the globally recognized Professional Scrum Master I certification exam (PSM I).

Scrum.org selects only the most qualified instructors to deliver this course. Scrum.org maintains the defined curriculum and materials to assure consistency and quality for delegates worldwide.

Prerequisites

This training is for anyone involved in software development using the Scrum framework. It is particularly beneficial for those people within an organization accountable for getting the most out of Scrum, including Scrum Masters, managers, and Scrum Team members.

Have a solid understanding of Scrum either through working on a Scrum Team, or through taking part in a Professional Scrum Foundations or similar course.

Delegates will make the most of the class if they have:

- Studied the Scrum Guide (required).
- Passed the Scrum Open assessment.

What You Will Learn

Over the 2 days, students will see why PSM is the cutting-edge course for effective Scrum Masters and for anyone coaching a software development team toward increased efficiency and effectiveness. The course includes advanced thinking for servant-leadership and behavioral shifts.

Throughout the training, students are challenged to think in terms of the Scrum principles to better understand what to do when returning to the workplace.

Students are challenged to think within the Scrum framework and the underlying values and principles to better understand what to do when returning to the workplace and facing complex decisions.

The PSM course is much more than just a set of slides and an instructor. In this course, students work on real-life cases with other classmates together as a team. This course is made up of discussions and hands-on exercises based upon real-life cases.

Outline

- Scrum theory and principles
- The Scrum Framework
- The Definition of Done
- Running a Scrum project
- Working with people and teams
- Scrum in your organization
