Overview

Learn the skills required to configure and manage Citrix Gateway features. At the end of the course, students will be able to configure their Citrix Gateway environments to address remote access requirements for Apps and Desktops.

Target Audience

Built for IT Professionals working with Citrix Gateway, with little or no previous Citrix Gateway experience. Potential students include administrators, engineers, and architects interested in learning how to deploy or manage Citrix Gateway environments.

Prerequisites

Accessing your course materials

Citrix course materials are available to delegates in e-courseware format through Gilmore e-bookshelf. QA ltd will share your name and email address with Gilmore for the sole purpose of provisioning you with your e-courseware. You will receive redemption details for your course materials directly from Gilmore shortly before your course is due to commence. Your course labs will be delivered through Skillable. QA will directly distribute to you an electronic key in order to access the labs.

Those delegates who are attending via either virtual or extended classroom will be required to provide either three monitors (to view courseware, labs and instructor demos simultaneously) or two monitors and a mobile device.

Technical pre-requisites

This course requires little to no previous experience with Citrix ADC; however, Citrix recommends a basic understanding of TCP/IP, HTTP, the OSI model, network devices, and networking protocols.

What You Will Learn

- Configure Authentication and Authorization
- Define End User Access and Experience
- Integrate Citrix Gateway with Citrix Virtual Apps and Desktops and additional resources
- Employ recommended tools and techniques to troubleshoot common Citrix Gateway network and connectivity issues
