Overview

Gain the skills to use Microsoft Purview to improve your data security in Microsoft 365. In this training, you learn how to create sensitive information types, create sensitivity labels, and use auto-labeling policies based on these labels. You also learn how to set up DLP (Data Loss Prevention) policies to safeguard your organization's data.

Prerequisites

Important This course may require the use of Multifactor Authentication (MFA). Please read this page and download the Microsoft Authenticator app (or similar app) prior to attending the course:

https://www.qa.com/resources/faqs/mfa-requirements/

Please see the below Microsoft article for further information on reasons for the MFA requirement:

https://learn.microsoft.com/en-us/entra/identity/authentication/concept-mandatory-multifactor-authentication

- Basic understanding of Microsoft 365 products and services
- Familiarity with Microsoft Purview
- An understanding of data security concepts

Outline

Module 1: Create and manage sensitive information types

Learn how to use sensitive information types to support your information protection strategy.

- Introduction
- Compare built-in versus custom sensitive information types
- Create and manage custom sensitive information types
- Describe custom sensitive information types with exact data match
- Implement document fingerprinting
- Describe named entities
- Create keyword dictionary
- Knowledge check
- Summary and resources

Module 2: Protect information in Microsoft Purview

Learn how to detect sensitive content as it's used and shared throughout your organization, in the cloud and on devices, and help prevent accidental data loss.

- Information protection overview
- Configure sensitivity labels
- Configure sensitivity label policies
- Configure auto-labeling policies
- Manage, monitor, and remediate information protection
- Summary and knowledge check

Module 3: Prevent data loss in Microsoft Purview

Learn how to discover, classify, and protect sensitive and business-critical content throughout its lifecycle across your organization.

- Introduction
- Data loss prevention overview
- Identify content to protect
- Identify sensitive data with optical character recognition (preview)
- Define policy settings for your DLP policy
- Test and create your DLP policy
- Prepare Endpoint DLP
- Manage DLP alerts in the Microsoft Purview compliance portal
- View data loss prevention reports
- Implement the Microsoft Purview Extension
- Knowledge check
- Summary
