Overview

Experienced Red Hat Enterprise Linux system administrators seeking validation of their skills, Students who have attended Red Hat System Administration I and II and are on the path to earn RHCSA certification, Experienced Linux system administrators who require a certification either by their organization or based on a mandate , IT professionals who are on the path to earn RHCE certification and RHCEs who are non-current or who are about to become non-current and want to recertify as an RHCE.

The performance-based RHCSA Exam tests your knowledge and skill in areas of system administration common across a wide range of environments and deployment scenarios. You must be a Red Hat® Certified System Administrator to earn a Red Hat Certified Engineer certification.

Not available. Please contact.

This certification exam is performance-based, meaning that candidates must perform tasks on a live system, rather than answering questions about how one might perform those tasks. The hands-on nature of this exam make real-world experience a critical facet of preparation. Exam results are emailed within US business days following the exam. An RHCSA certification has a 'current' window for 3 calendar years. This 'current' window can be extended by earning additional Red Hat credentials. See re-certification policies for more information.
