

# ONTAP Cluster Installation Workshop

Learn via: **Classroom / Virtual Classroom / Online**

Duration: **2 Gün**

## **Overview**

This course prepares you to deliver clustered Data ONTAP system installation services—meeting NetApp® quality standards and using NetApp best practices. Using your laptop, and the appropriate tools, you practice all installation tasks and set up NetApp equipment in a clustered configuration. You learn how to set up and test access to the system and the AutoSupportConnection, and conduct a customer briefing.

## **Prerequisites**

- Clustered Data ONTAP Fundamentals
- Clustered Data ONTAP 8.2 Administration or
- Clustered Data ONTAP 8.2 Update Curriculum
- Clustered Data ONTAP 8.2 New Features
- What's New in Data ONTAP 8.2 Licensing

## **OR**

- Clustered Data ONTAP Fundamentals
- !NA-CDOTDP

## **What You Will Learn**

By the end of this course, you should be able to:

- Complete pre-installation tasks
- Explain clustered Data ONTAP terminology
- List the cluster cabling options and restrictions
- Install and update cluster and management switches
- Install, configure, and test a two-node switched cluster
- Provide a customer with the appropriate information when you are handing off a system
