Overview

The **SAP HANA Installing and Administering course** provides in-depth knowledge of SAP HANA 2.0 database system administration. It covers all key administrative capabilities required for managing SAP HANA environments.

Through lectures and hands-on exercises, participants will learn how to install, update, and operate an SAP HANA 2.0 database using **SAP HANA cockpit 2.0**.

This training focuses on:

- SAP HANA 2.0 database installation and administration
- Multitenant database architecture
- SAP HANA cockpit 2.0 management tools
- Monitoring, backup, recovery, and troubleshooting

Based on Software Release

- SAP HANA 2.0 SPS07

Notes

This course can be combined with other SAP HANA curriculum courses:

- HA201 (High Availability & Disaster Tolerance)
- HA215 (Monitoring & Performance Tools)
- HA250 (Database Migration)

Prerequisites

Essential:

- None

Recommended:

- Basic Linux experience
- Basic database administration knowledge

Who Should Attend

This course is designed for:

- Database Administrators
- Help Desk / CoE Support Teams
- System Administrators
- Technology Consultants

What You Will Learn

After completing this course, you will be able to:

- Install, update, and configure SAP HANA 2.0
- Install and configure SAP HANA cockpit 2.0
- Perform administration tasks in a multitenant environment
- Start/stop systems and manage configurations
- Execute backup and recovery operations
- Troubleshoot SAP HANA database issues

Outline

- Introduction to SAP HANA
- Installation sizing and OS preparation
- SAP HANA installation and upgrade (multitenant systems)
- SAP HANA architecture and deployment options
- SAP HANA cockpit 2.0 installation and configuration
- SAP HANA administration tools
- Post-installation steps
- Database administration using SAP HANA cockpit
- Backup and recovery
- SAP HANA security
- Users and authorizations
