Overview

In this course, you will learn the basics of building a website from scratch using HyperText Markup Language (HTML) and Cascading Style Sheets (CSS). You will learn about best practices, how to lay a webpage out, as well as styles, background images, CSS-based navigation, multi-column layouts, forms, and uploading files to a server via FTP.

Who Should Attend?

Anyone who will need to build or manage a website in the near future

Outline

1. Coding Basics: Introduction to HTML Syntax

- Headings, Paragraphs, and Body Tags
- Strong and EM Tags
- The Doctype Declaration (DTD)
- The Lang Attribute
- Meta Tag: The Unicode Character Set

2. Coding Links

- Linking to Pages Within a Website
- Linking to Other Websites
- Opening a Link in a New Browser Window

3. Adding Images

- The Image Tag and Source Attribute
- Using the Width, Height and Alt Attributes
