Adobe Illustrator Advanced Training

Duration: **1 Day**

BILGINC IT Academy
info@bilginc.com
bilginc.com

This one-day advanced course will cover some of Adobe Illustrator's more advanced artwork creation tools and techniques. You will learn how to create more complex shapes and graphics, work with symbols and with masking. The course will also cover how to convert raster graphics into vectors, how to apply effects and how to work in perspective.

NOTE: This course is suitable for anyone using Illustrator CS5, CS6 or CC. If attending in a QA centre then the course will be delivered using Illustrator CS6.

Prerequisites

Delegates should have a good working knowledge of Illustrator and be able to create and manipulate designs, including:

- Creating basic artwork using shapes
- Modify paths
- Work with colour, fills and strokes
- Use Illustrator's Pen tool
- Save files as different formats to export from Illustrator

Dual monitor setup is required for when attending this course via the QA Attend from Anywhere delivery method.

What You Will Learn

- Create complex shapes using the Shape Builder and Pathfinder tools
- Import raster images and convert them to editable vector graphics
- Create and manage Illustrator symbols
- Work with clipping and opacity masks
- Apply blends to objects
- Apply Illustrator effects, including 3D
- Use tools to help create artwork in perspective
