Overview

Lead Lean-Agile transformation and accelerate value delivery with the power of AI.

For organisations seeking to remain competitive, business agility alone is no longer enough. Today's leaders need to understand both the operating principles behind enterprise agility and the **transformative potential of artificial intelligence (AI)**.

The **AI Empowered SAFe® Leading SAFe** course provides the foundational knowledge required to lead a Lean-Agile enterprise while introducing AI as a practical accelerator for modern leadership and business workflows.

Throughout the course, participants explore how to align complex organisations around clear objectives, strengthen customer centricity, and apply specific AI prompting techniques to make leadership responsibilities and workflows more efficient.

By combining SAFe practices with practical AI capabilities, leaders can better enable their teams to produce higher-quality solutions at greater speed while improving the flow of value across the organisation.

Prerequisites

There are no formal prerequisites for this course, and anyone interested in the subject is welcome to attend.

Before the instructor-led course, participants will complete approximately **three hours of preparation through SAFe Studio**, consisting primarily of video-based learning supported by additional reading.

A SAFe Studio account will be required to access these materials. Full instructions and support for setting up access will be provided. Learners will receive the preparation materials approximately **one week before the course start date**.

Who Should Attend

This course is particularly relevant for:

- Executive leaders
- Senior project, programme, or product managers
- Business and agility consultants
- Technology leaders
- Engineering leaders
- Contractors and government or military technical SMEs

What You Will Learn

By the end of the course, participants will be able to:

- **Lead Lean-Agile transformation:** Apply the SAFe mindset, values, and principles to support effective enterprise transformation.
- **Establish technical agility:** Understand how to organise cross-functional teams around value rather than traditional organisational hierarchies.
- **Align strategic objectives:** Bring the wider organisation together around clear objectives to improve the flow of value.
- **Apply practical and responsible AI prompting techniques:** Use responsible AI tools and prompting approaches to streamline workflows and address complex problems more efficiently.

Outline

The programme covers the following core areas:

- Adapting and thriving with SAFe
- Building a strong foundation with mindset, values, and principles
- Team and Technical Agility
- Agile Product Delivery
- Lean Portfolio Management
- Leading the Change

What Attendees Receive

Course registration includes:

- Digital course workbook and learning materials
- **One year of access to SAFe Insider**, including unlimited access to the SAFe Framework, SAFe CoPilot, and selected SAFe Connect Forums
- The opportunity to earn the industry-recognised **SAFe Agilist (SA) certification**, renewed annually

Exams and Assessments

Participants must attend **both days of the course** to qualify for the certification exam.

- **Exam name:** AI-Empowered SAFe Agilist Exam for Leading SAFe
- **Exam format:** Multiple choice
- **Delivery:** Web-based, single-browser, closed book, timed, and without outside assistance
- **Exam access:** Available through the SAFe Community Platform after completing the AI-Empowered SAFe® Leading SAFe course
- **Exam duration:** 90 minutes
- **Number of questions:** 45
- **Passing score:** 80%
- **Language:** English
