Overview

This SAFe Micro-credential course is designed to equip Agile professionals with the skills to implement AI responsibly in their teams and organizations.

This course will make you stand out as a leader in implementing responsible AI by providing hands-on experience and practical skills that ensure your AI projects are transparent, accountable, and aligned with human values.

Prerequisites

Participants should have attended either Implementing SAFe or **Leading SAFe** training.

Please note: This course uses the Collaboard collaboration platform during live virtual sessions. To fully participate and gain maximum benefit, learners should ensure they are able to access Collaboard in advance.

Use of a personal device (rather than a restricted corporate machine) is strongly recommended to avoid access limitations.

Target Audience

This course is designed for SPCs, RTEs, and Agile Coaches.

What You Will Learn

By the end of this course, learners will be able to:

- Explore and evaluate examples of RAI policies suitable for their organisations
- Clearly articulate the need for Responsible AI using an elevator pitch
- Draft Epic Hypothesis Statements aligned with RAI principles
- Develop practical, continuousimprovement action plans for embedding Responsible AI
